

## Tiffany Renee Cobb - Student of the Month

What brought Tiffany to Chowan University two years ago? Her original plans were to attend NC State because her twin sister, Terri Cobb, was enrolling in Meredith University and her boyfriend was to attend Louisburg College near Raleigh. However, when Tiffany participated in the Leadership Scholar Day at Chowan, she won a scholarship. It turned out that the financial aid package and scholarships offered by Chowan were worth more than the cost of enrolling at NC State. Tiffany exclaimed as she described the turn of events, "I absolutely love it here. I can't imagine being anywhere else. I enjoy the small community atmosphere and being able to talk to the professors on a personal basis."

Tiffany is a sophomore majoring in Business Administration with concentrations in both Accounting and Information Systems. She comes from Elizabeth City, North Carolina, where she graduated in 2006 with honors and was inducted in the Na-

tional Honor Society. At Chowan, Tiffany has been extremely involved. In addition to being a Leadership Scholar, she is a member of the Honors College, Phi Beta Lambda, Alpha Lambda Delta, Alpha Sigma Tau, a Resident Assistant, and a Tutor in Accounting.

She serves as treasurer of Alpha Sigma Tau, sorority. One of her goals is to bring the sorority out of debt with the national organization so the members can attend the convention in northern Virginia later this year.

Tiffany has been raised by her father Jim Cobb who is employed at the Norfolk Naval Shipyard. Her aspirations are to graduate from Chowan, gain employment with a CPA firm, attend graduate school to earn a master's in accounting and take the CPA exam in the future.

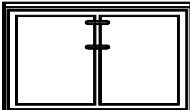

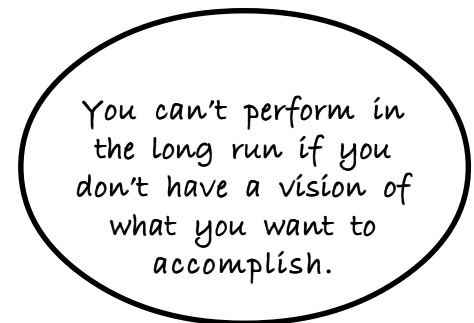

Congratulations to Tiffany as our Student of the Month!

## Chowan graduate speaks to management classes

Ms. Ann Levy, a Chowan accounting graduate, spoke to the Marketing Management and Management classes on Friday, January 18, 2008. Ms. Levy is a middle manager at the Social Security Administration.

Her discussion surrounded the idea of acceptable workplace behavior. She emphasized how an individual reacts to constructive criticism can many times determine his or her success or failure. In her particular job with the government, she mentioned how important it is to have good time-management skills and to work hard.

She believes that her determination has had a big impact on her current success at work. She not only emphasized the importance of writing clearly and concisely so the average reader can understand but also outlined steps she took to help her office prepare better written documents. She believes the classroom environment is an opportunity for students to propel themselves to the next level of achievement.
